About:

Our project "Next Generation Ticket Booking System" is a train ticket booking system. Normally, people use different sites to book tickets, see details of tourist attractions, and get weather reports for any area. Our system solves this problem by providing an integrated environment that is one stop for booking train tickets and learning more about any location. view Train Schedule, search trains, Seat availability, Train timings. We can also enquire about fare of different trains. can book seats online. This provides a safe and secure seat reservation system.

***** This website is built for the following purposes:

Admin Login

S.No.	Test Case	Expected Result
1.	Enter Email-id and	It will redirect you to admin
	password	page

• User Login

S.No.	Test Case	Expected Result
1.	Enter Email-id and password	It will redirect you to user
		page

• Weather Report

S.No.	Test Case	Expected Result
1.	Enter city	It will show temperature and Humidity
	name	of area

• Tourism Area

S.No.	Test Case	Expected Result
1.	Click on any	It will tourism videos, map and hotel
	State or Union	recommendation of selected place
	Terrtory	

• Train Addition By Admin

S.No.	Test Case	Expected Result
1.	Enter Train number, Train name, Source,	It will be added in the
	Destination, Arrival Time, Departure	Train list
	Time, Number of Seats, Fare	

• Train Cancellation By Admin

S.No.	Test Case	Expected Result
1.	Enter cancel button of train you want to	It will be deleted from
	cancel	the Train list

• Search Train between Stations

S.No.	Test Case	Expected Result
1.	Enter Source and Destination	List of Train between
		that stations will be
		shown

• Profile of user or admin

S.No.	Test Case	Expected Result	
1.	Click on	Person name, email, Booking history, its user-type	
	Profile	and Logout option is shown	

• Search Train by Train number

S.No.	Test Case	Expected Result
1.	Enter Train number	Train information will
		be shown

• Fare Enquiry

S.No.	Test Case	Expected Result
1.	Enter Source and Destination	Fare will be shown of all
		classes

• View Trains

1.	Click on Seat	All Train Seat Availability will be shown
	Availability	·

• Ticket Booking

S.No.	Test Case	Expected Result
1.	Enter Source and Destination, class preference and date	List of Train between that stations will be shown
2.	Select the train you want to book	Passenger detail form come
3.	Enter the number of passenger and passenger detail and click on book now	Ticket is generated
4.	Enter the mail id to which you wish to send the project	Ticket is generated

***** Technologies Used:

- 1. Frontend:
 - HTML
 - CSS
 - JavaScript
- 2. Backend:
 - MySQL
 - PHP

Software and Tools required:

- Browser: Any browser compatible to IE 6.0 and onwards.
- OS: Any operating system
- Platform: Visual Studio Code https://code.visualstudio.com/
- Front end: HTML, CSS, JavaScript
- Back end:
 - o MySQL https://dev.mysql.com/downloads/installer/
 - o PHP https://www.phpmyadmin.net/downloads/
- Server: XAMPP Server https://www.apachefriends.org/download.html
- **Dummy Database Initialization:**
 - Step 1:Open phpMyAdmin.
 - **Step 2**: To create table user_form for login execute following sql query.

```
CREATE TABLE user_form (
```

id int(255) NOT NULL AUTO_INCREMENT,

name varchar(255) NOT NULL,

email varchar(255) NOT NULL,

password varchar(255) NOT NULL,

user_type varchar(255) NOT NULL DEFAULT 'user',

PRIMARY KEY (id)

```
) ENGINE=InnoDB AUTO_INCREMENT=16 DEFAULT CHARSET=utf8mb4 COLLATE=utf8mb4_general_ci
```

Step 3: Now execute the following query to insert in user_form table.

<u>INSERT</u> INTO 'user_form' ('id', 'name', 'email', 'password', 'user_type') <u>VALUES</u> ('1', 'a nu', 'anu@gmail.com', '123', 'user')

Step 4: To create table train_info for login execute following sql query.

CREATE TABLE train info (

Train number int(5) NOT NULL,

Train name varchar(50) NOT NULL,

Source varchar(50) NOT NULL,

Destination varchar(50) NOT NULL,

Departure Time time NOT NULL,

Arrival Time time NOT NULL,

Seats Available(1st Ac) int(4) NOT NULL,

Seats Available(2nd Ac) int(4) NOT NULL,

Seats Available(3rd Ac) int(4) NOT NULL,

Seats Available(Sleeper) int(4) NOT NULL,

Fare(1st Ac) int(4) NOT NULL,

Fare(2nd Ac) int(4) NOT NULL,

Fare(3rd Ac) int(4) NOT NULL,

Fare(Sleeper) int(4) NOT NULL,

UNIQUE KEY Train number (Train number)

) ENGINE=InnoDB DEFAULT CHARSET=utf8mb4 COLLATE=utf8mb4 general ci

Step 5: Now execute the following query to insert in train_info table.

INSERT INTO 'train_info' ('Train number', 'Train name', 'Source', 'Destination', 'Departure Time', 'Arrival Time', 'Seats Available(1st Ac)', 'Seats Available(2nd Ac)', 'Seats Available(3rd Ac)', 'Seats Available(Sleeper)', 'Fare(1st Ac)', 'Fare(2nd Ac)', 'Fare(3rd Ac)', 'Fare(Sleeper)')

VALUES('22416', 'Amritsar Express', 'Howrah', 'Amritsar',

'21:30:00','22:09:00','72','96','150','450','3400','2700','1900','950'),

('12724','Attari Dli Express', 'Atari', 'Delhi',

'11:20:50','23:30:00','72','100','200','550','2000','1500','900','400'),

('12707', 'Gatimaan Express', 'Jhansi', 'New Delhi',

'16:00:00','02:40:00','60','100','350','630','2600','1900','1200','720'),

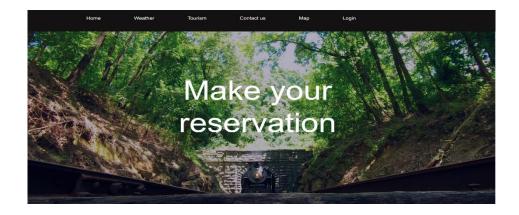

('15230','Betwa Express', 'Kanpur Central', 'Durg', '12:30:00','02:09:00','72','96','150','450','3400','2700','1900','950'), ('15909','Bhopal Express', 'Habib ganj', 'H Nizamuddin', '09:14:00','20:20:00','80','110','250','550','2000','1400','800','350');

❖ Importing and Running the project through XAMPP Server:

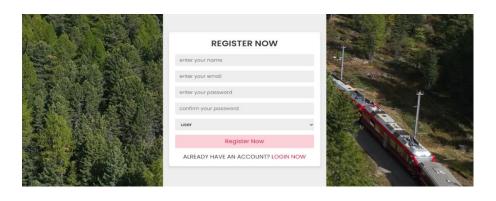

- Step 1: Create a folder trainbook in htdocs folder inside xampp folder in C drive.
- Step 2: Open XAMPP Server. <u>Install if not available</u>
- Step 3: Start Apache and MySQL.
- Step 4: Check Running the Site At http://localhost:8083/trainbook/
